

A photograph of a stream with a waterfall, surrounded by lush green ferns and vegetation. The water is clear and flows over rocks, creating white foam. The surrounding area is dense with green plants and ferns.

Tenmile Lakes' Basin Partnership

07' PROJECTS PRESENTATION

A photograph of a stream flowing through a forest. The water is dark and turbulent, with several large, dark logs and branches protruding from the water. The banks are covered in thick, vibrant green moss. The background shows more trees and foliage, creating a dense, natural setting.

TONIGHTS PRESENTATION INCLUDES:

A Coordinators View

TENMILE WATERSHED

Oncorhynchus kisutch
(Tenmile was historically Oregon's largest producer of Coho salmon.)

WATERSHED CHARACTERISTICS
WATERSHED SIZE: 96 SQ. MILES (61,440 ACRES)
TEN NAMED LAKES WITHIN THE WATERSHED WITH COMBINED SURFACE AREA OF 3,000 ACRES.
FOUR SUBBASINS: EEL LAKE, TENMILE, SAUNDERS LAKE, DUNES AQUIFER.

RESOURCE AREAS:
FOUNDED UPLANDS = 1,000 ACRES
ULTIMATE WATERSHED = 61,440 ACRES
PLANTATION = 1,000 ACRES

Map of the watershed and a photograph of a Coho salmon are also visible on the sign.
